

# A Million VMS. Test environments in Virtual and Cloud infrastructures

Don MacVittie, 2010-21-06

---

One thing that some companies seem to have grabbed onto and run with while others don't seem to have made the correct connections to fully utilize is testing in a highly virtualized or cloud environment. Of all the things these environments can do well, testing is one of the best possible use cases to deploy them. For some of you, this isn't news. I know some testing people who have this down to a science, and no doubt their wisdom is palely reflected in this post.
