

Crack open the books, it's iRule time

Joe Pruitt, 2008-29-08

Hot off the presses!

I just received an email from Beth, our Director of World Wide Customer Education, that starting now registration is open for a brand spanking new "Configuring BIG-IP V9.x With iRules" course offered by F5 Global Training - WOOHOO!

“This three-day course gives networking professionals an understanding of how to configure a BIG-IP v9 system with iRules. The course builds on the foundation of the [BIG-IP Local Traffic Manager \(LTM\) Essentials](#) course, demonstrating how to logically plan and write iRules to help monitor and manage common tasks involved with processing traffic on the BIG-IP. Course Labs consist of writing, applying and evaluating the effect of iRules on LTM traffic. This hands-on course includes lectures, labs, and discussions.

So if you find yourself in need of a little more assistance in iRule Elements, Syntax and Troubleshooting, iRule Optimization, iRule Security, Expressions and Operators, Variables and Loops, Data Classes, Persistence and Server Data, and Statistics, then this course is for you! The full class description can be found [here](#). The upcoming schedule in the US is Oct 14-16 in Seattle, Nov 10-12 in NYC, and Dec 2-5 in Seattle. Oh, and if you are in the UK, never fear... You can climb aboard and catch a class Sept 17-19, Nov 11-19, or Dec 10-12 in Chertsey, UK.

Congrats to the entire Global Training team on getting this course out!
