

Deploying F5 Networks BIG-IP Local Traffic Manager with WebAccelerator for Microsoft Office SharePoint Server 2007

Lori MacVittie, 2007-10-12

This [white paper](#) describes the deployment of F5 BIG-IP Local Traffic Manager (LTM) with F5 BIG-IP WebAccelerator in both symmetric and asymmetric deployments supporting Office SharePoint Server 2007 solutions accessed over a Wide Area Network (WAN).

For this test engagement, HP SAE Labs selected to use BIG-IP LTM with the WebAccelerator software module. BIG-IP LTM provides the load balancing functionality to ensure high availability and scalability, while WebAccelerator focuses on increasing overall HTTP and HTTPS performance.
