

# Dynamic Attack Protection and Access Control with BIG-IP v11

**Peter Silva, 2011-18-11**

---

We try to offer many learning opportunities thru webinars so if there are other topics you're interested in, there are some links below but also check out the [F5 WebCasts](#) page along with [DevCentral's Media](#) site. We also post video content to our [YouTube Channel](#), if that's your game. In this v11 webinar, I tell stories around various threats like DDoS, insecure DNS, web 2.0, AJAX, JSON payloads along with some unified access security/control based on identity. Originally offered to our EMEA audience, now for everyone to enjoy. Running time: 65:50

ps
