

F5 Application Security and IBM Guardium Security

Nojan Moshiri, 2013-25-02

With F5's presence at RSA and Pulse conferences we are going to be talking a bit about the new integration with Guardium that I blogged about last week. To help out the conversation, I put together a short video explaining the solution. Check out the video and find me at RSA and Pulse to discuss this in more detail.

Of course, the deployment guide is available for you here: <http://www.f5.com/pdf/deployment-guides/ibm-guardium-asm-dg.pdf> and you can bet I'll be back with a more detailed video showing the discrete implementation steps.

Video Table of Contents for the impatient:

Minute 0 to 2 – Whiteboard of the architecture

Minute 2 to 3:30 - Network diagram and overview

Minute 3:30 to 4:30 – Demonstration of the IBM WebSphere Commerce Server

Minute 4:30 to 5:00 – Demonstration of the Application Security Manager (ASM) interface

Minute 5:00 to 7:00 – Demonstration of the IBM Guardium interface (This demonstrates the linking of user data from ASM with SQL Data from Guardium for user Nojan)

Minute 7:00 to 8:00 – Demonstrate of the IBM Guardium interface (This demonstrates the linking of user data from ASM with SQL Data from Guardium for user David)
