

F5 International Technology Center Video Tour

Peter Silva, 2011-04-11

I visited F5's International Technology Center in the heart of London and want to share an amazing tour with Shareef Qureshi, F5 Product Management Engineer. The facility includes a state of the art lab facility, executive briefing center, workroom facilities and an immersive TelePresence room. See the equipment, how it's managed and cooled, the meeting facilities and more. Only a month old, the F5 ITC showcases some of the latest data center technology. F5's new London ITC will be the first Application Delivery & Data Solutions competency center in all of EMEA. Special thanks to Ross Draper for following us around.
