

I haven't gotten out much lately...

Deb Allen, 2007-29-06

... because I've been singularly focused on DevCentral content since I joined the group. Which is my only excuse for not having any brill comments or astounding insights on goings-on elsewhere in the world of technology.

But since there *is* lots going on behind the scenes here at DevCentral, I thought I'd take a sec to point out a few things that may have already been mentioned here & there but are cool enough I thought I'd call them out again:

- **HTTP iRules Wiki:** Our developers have been actively updating the [iRules wiki pages for HTTP commands and events](#), so be sure to check those out if you work with HTTP and iRules (and feel free to add any relevant details you may have discovered).
- **iRules CodeShare contributions:** There are also almost daily additions to the iRules CodeShare, and you can easily see on the main [CodeShare](#) page what's been added most recently. If you've created something cool or useful, it's super easy to [post your contribution](#) for iRules, iControl scripts, or [WebAccelerator profiles](#).
- **For example -- ProxyPass:** Submitted (and recently updated) by Kirk Bauer, one of our script-happy Sales Engineers, this very comprehensive [iRule](#) emulates Apache's [ProxyPass](#) & [ProxyPassReverse](#) reverse proxy/server mirroring functionality, and nicely demonstrates the power and flexibility of iRules for back end obfuscation.
- **DC Podcast:** If you missed the new weekly DC podcast, there's also a new dedicated DevCentral page where you can [download](#) them, and/or you can [subscribe](#) to the podcast on iTunes.
- **Forum post about per-server persistence cookie names:** I mentioned [this post](#) on the podcast today. It's a great example of how you can use iRules to work around a non-standard implementation of a common HTTP feature, but perhaps not everything you can do with an iRule, you should do...
- **LTM MIB Navigation Guide:** The MIBs changed significantly with v9.0, [here's a guide](#) (also mentioned on the podcast) to help find what you're looking for.

More later!
