

# Improving WAN VM transfer Speed with NetApp Flexcache and F5 BIG-IP WOM

Don MacVittie, 2010-22-10

---

That's a mouthful, but this is just a quick blog to point you at the actual blog I guest wrote for our [F5 Fridays](#) series.

In short, we've been toying with F5 [BIG-IP WOM](#) in the labs as a performance and distance enhancement tool for [VMWare](#) vMotion moves over the WAN when [NetApp](#) Flexcache is deployed. Pretty cool stuff, and while I wasn't involved in all of the testing that went on, as the Technical Marketing Manager for WOM I did get to see the results as they rolled out of the lab.

Take a read if you're doing Long Distance VMWare transfers with vMotion, it's well worth the five minutes of your life – [Efficient Long Distance Transfer of VMs with F5 BIG-IP WOM and NetApp Flexcache](#).

And next week we'll return to my regularly scheduled meandering about IT management, storage, and [WAN Optimization](#)...
