

# Interop2013: Partner Spotlight - Big Switch Networks

Peter Silva, 2013-09-05

---

Earlier this week, [F5 and Big Switch Networks](#) announced a [joint solution](#) that brings together F5 BIG-IP Local Traffic Manager (LTM), F5 iApps functionality, and the Big Virtual Switch network virtualization application. I meet with Aaron Edwards, Big Switch Technical Marketing Engineer to learn more about this solution that enables organizations to deploy complex cloud applications while Big Virtual Switch and BIG-IP LTM transparently manage network configuration in the background.

Leveraging integrations with popular orchestration platforms such as OpenStack, Big Switch and F5 together can fully manage all layers of the networking stack to dramatically simplify application deployment in cloud environments.

ps
