Jason Rahm, 2018-30-01

Super-NetOps is not a technology, it's an evolutionary journey. Already featuring two complete classes on integrating NetOps expertise into the benefits of a DevOps world, this training program is poised to help the NetOps professional take a well-deserved seat at the continuous improvement/continuous deployment table. Join me in this latest episode of Lightboard Lessons where I cover why Super-NetOps matters.

This two-minute elevator pitch introducing the Super-NetOps initiative, featuring Nathan Pearce and Hitesh Patel, is worth your time as well.
