

# Load Balancing Dynamics CRM

Ryan Korock, 2008-13-03

---

We've been working with the Microsoft Dynamics team for over a year now building and testing a scalable architecture for their CRM package. And now with the release of CRM 4.0, BIG-IP plays a critical role in providing high availability, scalability, and performance for an enterprise deployment.

If you're interested in deploying BIG-IP with Dynamics CRM, please take a look at the deployment guide here -> [Microsoft Dynamics CRM 4.0 Deployment Guide](#)

Just to let you know, we've also slated a round of testing for WebAccelerator with Dynamics CRM to happen later this year. We should be able to get some pretty compelling acceleration results from that. I'll keep you posted on how the progress of that!

For now,  
Ryan
