

Making Use of kSOAP2 at Dr. Dobbs

Don MacVittie, 2008-24-06

Hey all, shameless bit of self-aggrandizement here...

I can't find the shameless self-aggrandizement tag in our tags list though, so I'll mark it as development. ;-)

Dr. Dobbs Journal has run my article on [programming in kSOAP2](#). This article has more info and compliments the Tech Tip here on DevCentral entitled [The Minimum Steps to use KSOAP](#). If you're a mobile device developer, these two articles will help you get a jump start on using kSOAP to SOAP-enable your applications.

Yeah, I'm a little bit pumped. Even when I worked for CMP - the company that owns Dr. Dobbs - I couldn't get first publication there, though they did re-print a couple of my Network Computing articles. So this is a first for me, in a publication I 'grew up' with.

The progenitor of both of these articles was the [Blackberry iControl Application](#) lab that lets you monitor your BIG-IP from just about anywhere. Check it out if you haven't yet.

Don.
