

# Mobile Device Support for VMware View

Nick B, 2012-07-02

---

End user computing means that a wide range of mobile devices from laptops to tablets and from desktops to smartphones are being used. The diversity of these mobile devices and the sheer number of them in the workplace can overwhelm IT and strain your resources. Access and performance are key support concerns. And, since many mobile devices are personal, security is absolutely critical. F5 provides intelligent mobile device support for VMware View. This benefits IT with greater access and compliance control, while at the same time, allowing your employees the freedom to use their mobile device of choice. F5 can help by making VMware View secure, fast, scalable, and available.

More information about F5's solution for VMware View can be found at <http://www.f5.com/view>
