

Pulse2013 ‐ BIG-IP ASM & IBM InfoSphere Guardium

Peter Silva, 2013-04-03

I meet with F5 Solution Architect Nojan Moshiri to learn about the integration between BIG-IP ASM and [IBM's InfoSphere Guardium](#) offering real time data security along with contextual meta data associated with the SQL data. Each enhances the other to provide both defense-in-depth protection and contextual security information. Powerful stuff.
