

# Quick security survey for UK IT professionals &ndash; 1 in 50 respondents win an iPad Mini

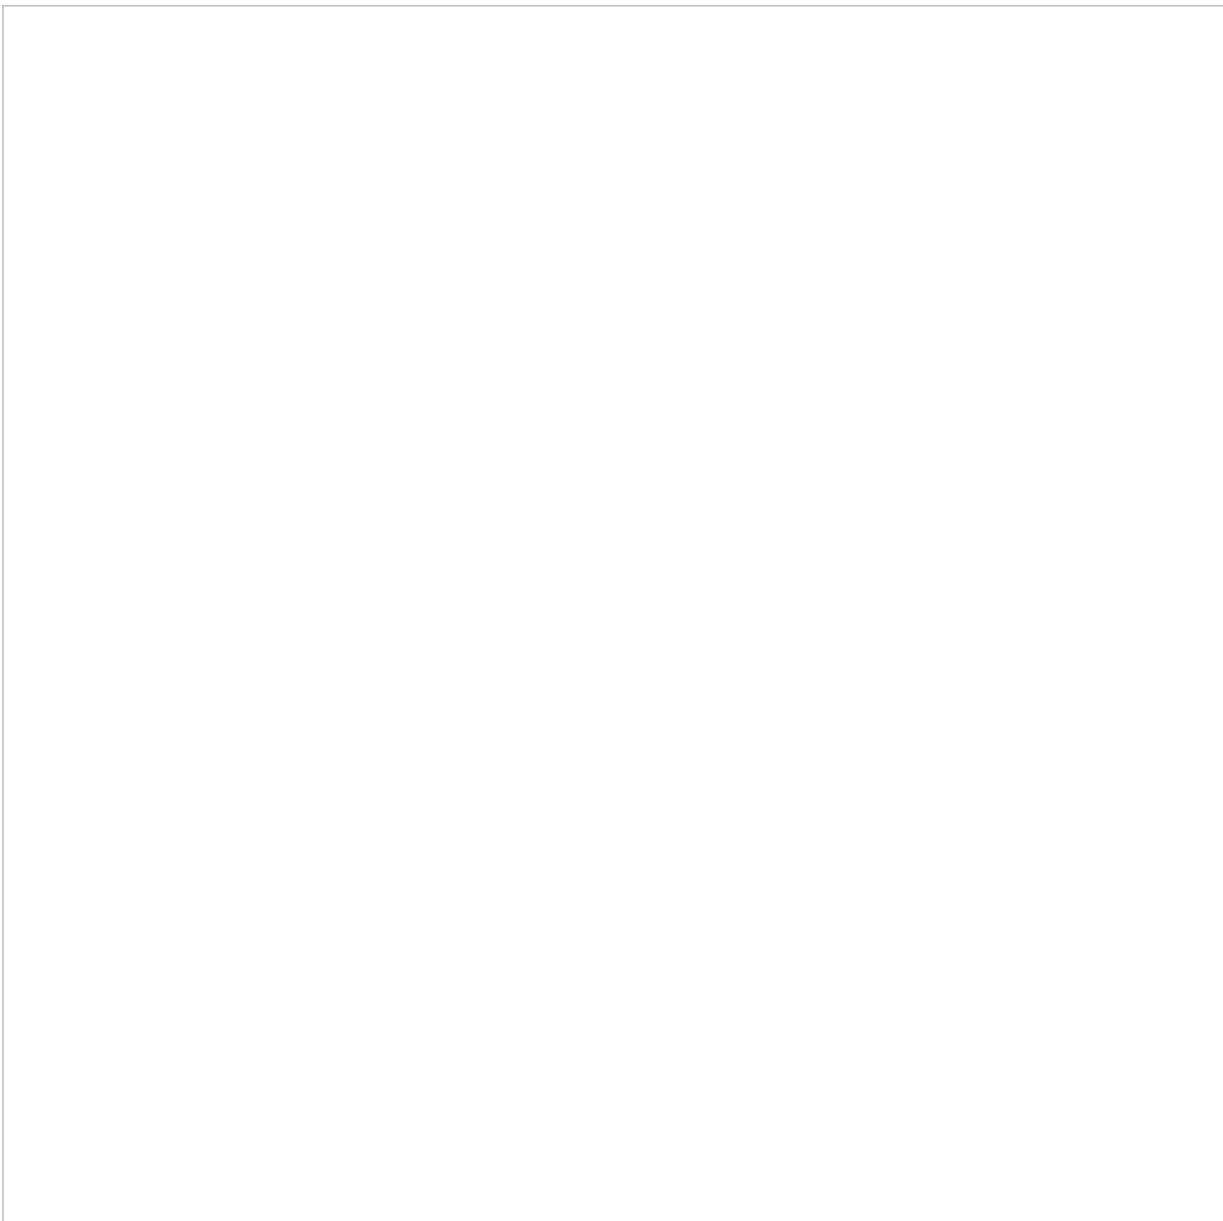

**Nick B, 2013-23-01**

---

With attacks by external agents growing 6% over previous years and 70% of exploits taking advantage of known vulnerabilities (comprising 98% of all breaches documented in the 2011 Data Breach Investigations Report (DBIR) from Verizon), existing solutions are still being underutilized when mitigating risk to an organization.

In conjunction with [Computerlinks](#), one of F5's distribution partners in the UK, we've put together a short survey to get a broadband view of the current state of the market so, IT professionals in the UK, we'd love it if you could spare a few minutes to fill it in. Just click [here](#). iPad Minis are on offer for completion – a one in 50 chance of winning one.
