

RSA 2014: Secure Web Gateway (feat Moses)

Peter Silva, 2014-24-02

I grab Joel Moses, Director Product Management Engineering, to understand how F5 simplifies web security policy creation, protects enterprises and employees from web threats, malware, and data loss. [Secure Web Gateway](#) protects your organization by validating the integrity of users and their devices as well as the Internet sites that users are accessing. Joel gives a great demo and explains the benefits of the solution.
