

# Stop, Click & Listen

Peter Silva, 2009-05-03

---

A couple days ago I [talked](#) about our efforts to make multimedia versions of some F5 content available, to go with our printed materials. Today's story is an [audio version](#) of Lori MacVittie's 'Built to Scale' whitepaper.

From Lori's intro:

Incorporating an Application Delivery Controller (ADC) into the architecture of a web application provides the ability to scale seamlessly without rewriting the application or suffering outages. By proactively designing a scalable application that incorporates the advanced features of an ADC, you can ensure that when your application hits superstar status, it will perform like one.

You can listen right from DevCentral or download the mp3 to catch it later.....and more are coming! Stay tuned.

ps
